The Fruit Bitz is a dainty sweet snack that embraces the vibrant flavours and natural essence of the orange fruit. Orange peels and pulp contain various essential oils that hold a distinct aroma and have a unique combination of bitter and sweet notes. Additionally, those fruit sections are a rich source of both soluble and insoluble fibres. This product is designed to take the consumer on a sensory journey that delights the palate with its impeccable blend of flavour and promotes a sustainable solution to the increasing orange juice production that leads to a large peel and pulp waste.
