We are a team of four driven and passionate students from the Master's program in Health Food Innovation Management at Maastricht University, Campus Venlo. Together, we are on a mission to make functional nutrition both accessible and enjoyable. VitaPre offers a refreshing, science-backed way to support your wellbeing — in the form of convenient, great-tasting ice drops. Each serving includes five small round ice drops that melt into a delicious strawberry-lemon lemonade, enriched with prebiotic fibres and vitamin B12.

VitaPre is ready in a few minutes and easy to freeze at home. It is designed for busy, health-conscious individuals, athletes, people with diabetes, older adults and people with IBS-like symptoms. VitaPre's Functional Ice Drops deliver a refreshing hydration experience while boosting digestive health and supporting energy metabolism. Simply freeze the ice drops at home and enjoy a tasty functional beverage anytime.
