Surviballs: the crunchy & creamy snack to survive your ride back home: healthy, convenient and taste exploding.

Surviballs consist of an oven-baked crunchy cracker outside made from beetroot, rye, oats, flax seeds, dried seaweed and onion peels. The balls are filled with a creamy hummus from lupin beans, tahin, lemon juice and spices. The combination of ingredients used created a highly nutritious snack: they boost your protein and fiber intake. On top of that, the use of seaweed and onion peel residues created a low-salt and sustainable product while still giving a salty and delicious taste.

Surviballs are packaged in a convenient tube with a flip-top, which can be opened with one hand only. Just grab it, pop it & enjoy it.

Time to survive your ride! Surviballs, the guilt-free savoury snack to reload & explode.
