Product Sopropo spring rolls

The sopropo spring roll is developed to be fit for everyone, including diabetes type II patients. The sheets of the spring roll are beancurd sheets, this makes the spring roll low in carbohydrates. The product is rich of proteins and the sopropo makes it especially healthy for people with diabetes type II.

The sopropo spring roll would be available at the freeze department of supermarkets and are easily ready due to the short preparation time.

Mentor Robbert Boink

Coach (FNLI) Fokke Dooper- UCC Coffee
