Introducing "BeerBites": Small bites with big flavour!

Tired of the same old snack in a café?

BeerBites is the solution, made with the best beers and Brewer's Spent Grain, a by-product of the brewing-process. We repurpose this product in our BeerBites. BeerBites are crunchy from the outside and creamy and cheesy on the inside.

When biting in a BeerBite you will be submerged in the flavour of beer and cheese giving you that salty and umami taste.

Because of the slight hint of beer it pairs perfectly with the beer already available in your favourite café.

Why wait? Embrace sustainability combined with an amazing flavour profile. Get ready to discover a new world of premium frozen fried snacks.
